

CLASSIC BRITISH LIGHTING

Vintage Lighting Manufacturer & Supplier

Made In England

PRODUCT CARE & LIVING FINISH

Due to the “Living Finish” and unlacquered nature of our products, the patina can evolve and change over time due to oxidisation and handling. This Living finish adds to the unique warmth, charm and elegance of our vintage brass luminaires.

Our brass is unlacquered and polished via only mechanical means, this creates a beautiful satin effect to the patina, which if left untouched, will naturally become dull and darken over time. To keep the product polished and to create a shine, we would recommend a good beeswax or natural polish. Do not use any harsh chemicals or degreasers as this can strip portions of the patina.

We recommend a natural polish only

Do not use any harsh chemicals or degreasers
